

Python (Basics)

Table of contents –

- Introduction
 - What is programming language?
 - How python is different from other PLs?
 - Why and where python is used?
- Installation
 - Windows/Linux/macOS
 - Python IDE
 - Command Line Interpreter
 - The First Program
- Python Character Set
 - Keyword
 - Identifier
 - Operator
- Datatypes
 - Numeric: Integers, Float, Complex
 - String
 - Boolean
- Built-in Data Structures
 - List
 - Tuple
 - Dictionary
 - Set
- Type Conversion
 - Implicit
 - Explicit
- Indexing and Slicing
- Indentation

- Flow Control
 - Conditional Statements
 - Loop Statements
 - Loop Control Statements
- Function
 - Built-in Function
 - User-define Function
 - Methods
 - Anonymous Function
- Variable Scope
- Interactive Help
 - How to read documentation
- Basic Algorithms
- Python Comprehension
- File Handling
- Built-in Modules
